DCASE2026 Task3B AV-SELD submission

This package contains four Task3B audiovisual systems prepared from the v16 plus same-input 2023 prior release.
Systems 1-3 are clean variants based on v16 and a 2023 AV-SELD teacher prior. System 4 is a separate non-clean risk candidate retained only for explicit comparison/submission choice.
Prediction JSON files follow the official Task3 example with a top-level annotations list and mix001.json to mix079.json naming.
